TECHNICAL FEATURES:

- Single-phase motors with 4 shielded poles, working at a nominal voltage of 230-240V~, 50-60 Hz and a power rating of ~5 to ~34Watt.
- Motor insulation class B.
- Protection with the rotor stopped by trip switch protector.
- Motor shaft support with self-lubricating, self-aligning bushings.

- The main characteristic is that they have a connector for mobile connection to the power supply cable.
- Can be installed horizontally or vertically.
- Anticlockwise rotation seen from the shaft side.
- Continuous working at AMBIENT temperatures of -40°C to +40°C
