\* BETA Die grinder mod. 1933 (technical information on the previous pages)

Practical, handy wire stripper, capable of stripping all types of enamel coated wire automatically. Equipped with WIDIA blades for long life and low maintenance costs. Protection in unbreakable aluminium for safer use. Strips cross sections from 0.5 mm to 4.5 mm

## USE

- Insert the wire stripper rod in the chuck on the drill, pushing it all the way in. Lock the chuck with the key (provided with the grinder).
- Insert the wire to be stripped in the hole located on the head of the body, activate the drill, and extract the wire during rotation.
- For correct use and greater duration of blades, use the tool at a speed

not exceeding 8,000 RPM. A rotary speed that is too high may cut the wire or diminish the lifespan of the blades.

COMPLIANT with the following regulations based on the requisites of Machinery Directive 2006/42/CE:  
CEN 414:2014 - UNI EN ISO 14120:2015 - EN ISO 12100:2010

On request, other spare parts are available

## WORKBENCH KIT

For automatic wire stripper SA01

In some cases, it is necessary to have wire stripper SA01 fastened to a workbench. For this purpose there are two types of KIT available

- PNEUMATIC KIT MADE UP OF:

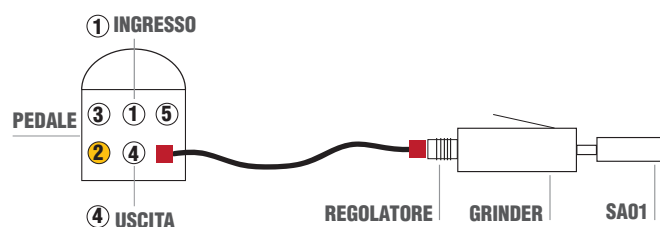

A drive pedal, pipes and couplings, grinder and support

- ELECTRIC KIT MADE UP OF:

A drive pedal, pre-wired cables, and grinder support

\*N.B.: SA01 wire stripper not included in the KIT, must be purchased separately

\*\*N.B.: SA01 wire stripper and electric grinder not included in the KIT, must be purchased separately

KIT BANCO PNEUMATICO PER SPELAFILI AUTOMATICA SA01:

■ N° 2 ADATTATORI DA 1/4 POLLICE ~ N° 1 TUBO RIGIDO O FLEX

② N° 1 TAPPO DA 1/4 POLLICE
