Usable with drills

DESCRIPTION	WIRE CROSS SECTION	DIMENSIONS	g	CODE	€
Wire stripper insert MOD. 1 x enamel-coated wire 0.5 - 2.0	100 X Ø15	50	0701100	
Wire stripper insert MOD. 2 x enamel-coated wires 1.5 - 3.0	100 X Ø15	50	0701101	450.00
Wire stripper insert MOD. 3 x enamel-coated wires3.0 - 4.5	100 X Ø15	50	0701102	

measurements in mm
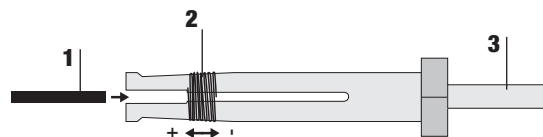

1. wire
2. stopper spring
3. stem adaptable to drills

DESCRIPTION:
An easy insert - for stripping enamel-coated copper and aluminium wire - which can be adapted to different types of drills (drills, screwdrivers, grinders) - both battery and pneumatic powered - thus reducing production costs. Thanks to the compact shape and structure, does not have sharp corners or accessible blades, guaranteeing extreme safety during use.

USE
Moving the stopper spring along the stem of the wire stripper, it can be adapted to the different wire cross-sections. Using this adjustment method, no traces of paint remain on the wire and there is no risk of damaging it.

CHARACTERISTICS
There are three different models, capable of stripping copper and aluminium wires with the following cross sections:
MOD. 1: 0.5 mm - 2.0 mm
MOD. 2: 1.5 mm - 3.0 mm
MOD. 3: 3.0 mm - 4.5 mm

SHARPENER

## *For portable wire stripper*

DESCRIPTION:
A simple tool that makes it possible to sharpen the wire stripper insert, thus increasing duration of its efficacy. Inside the pack, there are blades to be able to sharpen all models. Can be installed on work surfaces that are maximum 5 cm thick.
